### **Safe drinking water for Rural School**

ROTARY CLUB OLIVOS has planned a project to supply safe drinking water to Rural Scholl # 254, located in a place called "EL PARAISAL" which is at the entrance to a jungle area named "THE IMPENETRABLE", in the Chaco Province, about 1200 Km from Buenos Aires City, Argentine Republic. The project consists in moving the present pumping windmill from the area where the underground table water has dried up, to a new spot where there exists an underground river with safe drinking water all year round. From this spot a 300 meters long aqueduct is planned to be constructed up to the school which is for 50 children. The Total Cost will be U\$S 3000,-. We must help this community of children that are being educated because there is no other way to solve their problem of a total lack of safe drinking water.

### **Agua potable segura para Escuela Rural**

ROTARY CLUB OLIVOS proyecto un trabajo para provisión de agua potable segura a la Escuela Rural #254 ubicada en el paraje *El Paraisal* a la entrada de un área selvática denominada *El Impenetrable* en la Provincia del Chaco a unos 1200 Km. De Buenos Aires, Republica Argentina. El proyecto consiste en trasladar el actual molino bombeador desde donde se ha secado la napa de agua, a una nueva localización donde existe un río subterráneo con agua segura todo el año y desde donde se construirá un acueducto de 300 metros hasta la Escuela donde concurren 50 chicos. El Costo Total es de u\$3000.- Necesitamos ayudar a está comunidad educativa que de otra manera no tiene posibilidades de solucionar está carencia de agua potable.
